

Cameron Eagans

Full-stack software engineer and technical leader.

I'm an experienced full-stack software engineer and technical leader with over 15 years of experience. I've worked on a handful of the largest properties on the Internet, and my open source projects have been downloaded over 45 million times.

Staff DevOps Engineer

Swirls Labs | Remote

Mar 2023 — Present

- Rolled out internal tooling for inspecting and exploring preproduction cryptocurrency networks.
- Spec'd, wrote, and deployed a PAM module and SSH auditing tools to secure production cryptocurrency network nodes.

Software Architect

Agile Six | Remote

Jul 2021 — Nov 2022

- Migrated VA.gov's Drupal 9 CMS to a new Kubernetes-based hosting system; decommissioned **hundreds** of legacy hosts.
- **Decreased overall test suite run time by 92%**; increased production deployment rate from once per day to 24+ times per day.
- Contributed to PACT Act-related efforts to make veteran benefit eligibility determinations in **minutes, not months**.

VP, Engineering

Digital Deployment | Remote

Jan 2019 — Jan 2022

- Led the migration of hundreds of Drupal sites (including government and pension systems) from many hosting providers to Pantheon with **no downtime or data loss**.
- Architected and led buildout of a **new Drupal-based CMS platform**, including a migration path from the previous platform.
- Led the development of a mobile app for pension systems.
- **Oversaw the sale of a business unit** and led post-sale support.
- Led the development and implementation of internal engineering standards and practices, including adopting Shape Up across the business.

Senior Software Engineer

Drud Technology | Remote

Nov 2017 — Jan 2019

- **Co-maintained ddev**, an open source local development tool for web developers. **Added support for Backdrop CMS** to ddev.
- Architected and implemented a **public-facing REST API for Kubernetes-based hosting system**.
